Professional Statement

Computer Science student at the University of Waikato with an A+ average and hands-on experience building full-stack web applications, secure APIs, database-backed workflows, and cloud deployment infrastructure. Learned ASP.NET Core, EF Core, Docker, Terraform, and AWS to turn a static portfolio into a live production-minded platform, resulting in validated contact submissions, JWT-protected admin workflows, privacy-conscious IP hashing, automated backend tests, and an AWS-hosted API health check.

Technical Skills

Languages: Python, Java, C#, TypeScript, JavaScript, HTML, CSS, SQL

Frontend: React, Vite, Next.js, Tailwind CSS, responsive design, reusable components

Backend and Data: ASP.NET Core Minimal APIs, Entity Framework Core, PostgreSQL, Prisma, REST APIs, CRUD workflows, data validation

Cloud, Security, and Testing: AWS ECS Fargate, ECR, RDS, ALB, CloudFront, Secrets Manager, Terraform, Docker, JWT auth, CORS, rate limiting, xUnit, Vitest, Git

Computer Science: Data Structures and Algorithms, Object-Oriented Programming (OOP), software engineering principles, API design

Projects

Full-Stack Portfolio Platform | React, ASP.NET Core, PostgreSQL, AWS

- Learned ASP.NET Core Minimal APIs and Entity Framework Core to solve the limitation of a static portfolio contact form, delivering validated public submissions, persisted PostgreSQL records, and admin-ready review endpoints.
- Applied JWT authentication, CORS controls, rate limiting, and salted IP hashing to protect the contact workflow, reducing avoidable abuse and avoiding storage of raw visitor IP addresses.
- Used Docker, Terraform, and AWS services including ECS Fargate, ECR, RDS, ALB, CloudFront, Secrets Manager, and CloudWatch to solve deployment repeatability, resulting in a live frontend, pushed API image, healthy AWS API endpoint, and 39-resource dev infrastructure apply.
- Added xUnit and EF Core InMemory tests for API health, validation, persistence, admin access, status updates, and database model rules, improving confidence in backend behavior before deployment.

Personal Analytics Dashboard | Full-Stack Analytics Web Application

- Learned Clerk, Prisma, PostgreSQL/Neon, Zod, and Recharts to solve the problem of fragmented personal tracking, resulting in an authenticated dashboard for logging study, finance, health, and personal entries.
- Implemented validated CRUD workflows and filtered history views so users could create reliable database-backed records and review trends instead of relying on disconnected notes.
- Built reusable React/Tailwind components and Vitest-covered utility logic, improving maintainability across summary cards, charts, filters, and data-entry views.

Education

Bachelor of Science in Computer Science | The University of Waikato | Hamilton, NZ | In progress

- Current A+ average.
- Relevant coursework and applied focus: Software Engineering, Artificial Intelligence, Data Structures and Algorithms, Java, Python, full-stack web development, API design, database-backed applications, and cloud deployment practice.

Professional Experience

Grocery Assistant | New World Te Rapa | Hamilton, NZ | Jan 2025 - Present

- Coordinated with team members in a high-volume retail environment to solve daily stock, customer, and workflow constraints while maintaining reliable operations under time pressure.
- Learned to prioritize customer requests, stock checks, and repeatable workflows to reduce handoff friction and communicate clearly across busy team shifts.

Fresh Foods Assistant | New World Te Rapa | Hamilton, NZ | Feb 2024 - Jul 2024

- Handled customer questions and product-related issues with clear communication, solving immediate service problems while maintaining a professional customer experience.
- Worked with colleagues to adapt to changing priorities and maintain efficient workflows, supporting consistent service during peak periods.
- Built reliability and detail orientation through quality checks, process consistency, and customer-facing responsibilities.

Activities and Leadership

Lead Graphics Designer / Board Member | University of Waikato Sri Lankan Association (UWLSA) | Hamilton, NZ | Jan 2026 - Present

- Designed posters and banners for UWLSA events and fundraisers, supporting campaigns that raised over NZD \$2,000 for club activities.
- Applied an SDLC-style design process by gathering requirements, producing draft concepts, presenting demo posters, and iterating on feedback to deliver event-ready graphics.
